According to the Basel Committee on Banking Supervision, the implementation of Liquidity Risk regulations

“ should be tailored to the size, nature of business and complexity of a bank’s activities ”

Blueprint is a service supplied to financial institutions requiring expert-led consulting on Liquidity Risk Management. **Blueprint** is a service leading the way for modern financial firms to plan compliance with the increasing burden of single jurisdictional and cross-border Liquidity Risk Regulations.

21st Century Tools

Pelican Consulting has launched a regulatory database called **Maximus** which keeps track of the Liquidity Risk regulations issued by the Basel Committee and the FSA. **Maximus** has mapped these regulations to our proprietary product **Blueprint**. **Blueprint** was developed by the team which built the first enterprise-wide Liquidity Risk Management System for Deutsche Bank. **Blueprint** is practitioner-led design which can be tailored for all institutions and can be adapted to any IT project – internal build or vendor supplied technology.

Maximus and Blueprint are effective tools for creating:

- *the basis for RFIs / RFPs*
- *a technology road map for discussion with regulators; and*
- *an ability to develop Cost Benefit Analysis for compliance.*

Maximus also provides links to our other services, in particular **Gap Analysis**, **Healthcheck** and **Best Practice**.

Access to **Maximus** is **free** when customers sign up for the **Blueprint** service.

Blueprint is ideal for CEOs, CROs and Heads of ALM, Treasury and Finance who need a means for managing regulatory IT projects – supported by the confidence that the people providing this service are experienced practitioners in the field of Liquidity Risk.
